

Largest International Rotomolding Exposition

Every three years, ARM (Association of Rotational Molders) brings the world of rotomolding together under one roof for Rotoplas!

Your colleagues from across the globe will meet in Chicago this October to see new products, improve their manufacturing process, and learn from one another. Forty-five companies have already registered to exhibit. Meet them at Rotoplas or book a booth for your company. As a member of an ARMO organization, you will receive the member rate for this meeting!

In addition to the member rate, register early for an advance registration discount. To register, and for more information, visit www.rotoplas.org.

Reserve Dates

October 6: A tour for non-North American attendees will be held. The tour will visit Romotek and Elkhart Plastics in Indiana.

October 7: Seminars on Process vs. Design, Lean Manufacturing simulations, and An Introduction to Rotomolding.

October 8 & 9: Exhibit hall, general sessions, and workshops.

Seminars Scheduled with Expert Speakers

Tuesday, October 7

Process Vs. Design - What benefits emerge from good design combined with good processing? (*Michael Paloian, Integrated Design Systems Inc. & Paul Nugent, PhD, MEng*)

Introduction to Rotational Molding- What are the key elements of the rotational molding process, from materials to equipment to process control methods? (*Dru Laws, Seljan Plastics*)

Lean Manufacturing Simulations - Can you benefit your organization with a better understanding of lean operating practices and actions that lead to performance improvement? (*Michael Bremer, The Cumberland Group*)

Learn more about the seminars and the rest of the schedule [here](#).

Required Documentation

Any attendees requiring a VISA letter don't hesitate to inquire in advance. Please email info@rotomolding.org
